### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The closest prior art to the amended claims of the instant invention is JP 04-359,144, which discloses a NO<sub>x</sub> sensor having an electrode 15 with a catalytic coating of zeolite 20 placed over said electrode.

However, the zeolite coating of JP '144 is disclosed for the conversion of NO<sub>x</sub> into N<sub>2</sub> and O<sub>2</sub>. This differs from the claims of the instant invention where the coating must be capable of oxidizing NO to NO<sub>2</sub>. Moreover, it would not have been obvious to one of ordinary skill in the art to modify the coating of JP '144 to make it capable of performing the claimed conversion because the sensor of JP '144 would appear to rely on the liberated O<sub>2</sub> for its detection of the NO<sub>x</sub> concentration.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
